VISION

Your trusted partner in protecting products and powering sustainable global trade.

MISSION

Deliver intelligent, innovative solutions that safeguard product integrity, reduce risk, and generate lasting value and sustainability benefits across the supply chain.

01 SUPER DRY

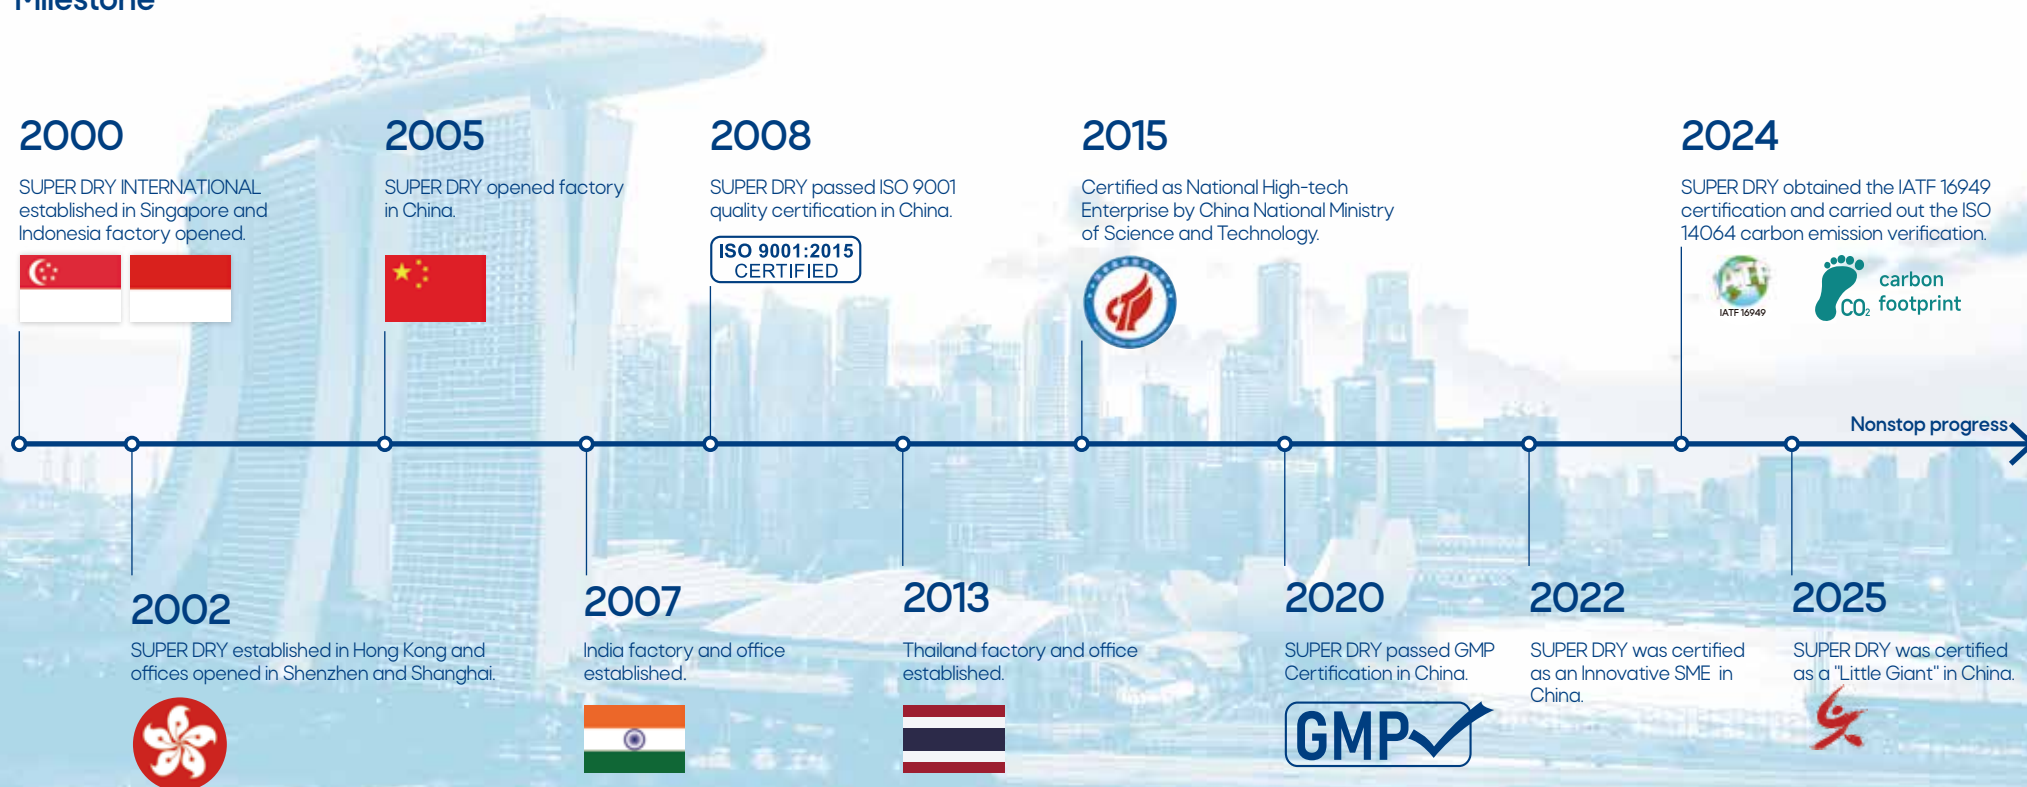

Our Story

Founded in the year 2000 by three executives from the shipping and manufacturing industries, SUPER DRY was created with a shared mission: to become an impactful guardian of the global supply chain. Today, SUPER DRY is a recognised leader in the mould prevention industry, relied upon by top global brands to protect their products from moisture damage.

SUPER DRY takes pride in delivering innovative solutions that set us apart from the competition. Our comprehensive portfolio includes desiccant and non-desiccant products, developed to meet the needs of a wide range of industries. By combining expertise in international shipping logistics with a strong commitment to quality and innovation, SUPER DRY has earned its reputation as a reliable global partner.

Whether you need protection against moisture, oxygen or other environmental threats, our products are fully customisable to meet your specific needs. Ensuring that your goods arrive safely, no matter the journey.

Milestone

Global Sales Network: Worldwide Offices & Distributors

SUPER DRY operates four factories strategically located along the Asian manufacturing coastline. The sales and service network covers the whole world.

Production Capacity & Achievements

01	100,000 GMP workshop A dust-free controlled environment allows strict management of airborne contaminants and a stable environment. This ensures consistent conditions, enhanced product reliability and ultimately guarantees highly consistent product quality.	
02	Fully automated production lines SUPER DRY independently developed a comprehensive series of fully automated production lines, significantly reducing raw material waste. In 2024, these innovations enabled SUPER DRY to cut flash waste by 5 tons.	
03	Automated AI defect inspection The AI automated inspection system utilises deep learning, computer vision and data analytics to detect and eliminate defective products with greater accuracy and speed. This intelligent AI solution forms a robust quality control of SUPER DRY products.	

R&D Investment

01	Empowering R&D and customisation On site R&D facilities are equipped with world-class machinery, enabling precise testing and meeting customer customisation requirements.	
02	Collaborating on sustainable materials innovation SUPER DRY partners with leading universities and laboratories in the field of materials science to develop next-generation sustainable materials.	
03	Tailored solutions by a dedicated professional team Design and technical teams work closely with clients to develop customised products that meet customer requirements.	

ESG Practices

E

Environmental

- Paperless office practices, saving 12,000 pages per year
- Replacing bottled water with water purifiers to save 4,700 barrels of drinking water

- By using green electricity and upgrading production lines, a 6% reduction in electricity consumption and significant reductions in production waste was achieved

- Launched a travel management platform that enables accurate tracking of business travel carbon emissions

- All product packaging is made entirely from FSC-certified paper

S

Social

- Prioritise employee development and provide support for further education
- Care for employees' physical and mental well-being
- Providing support to school for students with special educational needs
- Community development through environmental and cleaning initiatives
- Sponsoring sports teams and events

G

Governance

- Established an ESG Management Committee and integrated ESG into the company's strategy
- Always prioritise outstanding product quality and compliance with international standards
- Ensure strict adherence to all laws and regulations related to environmental protection, labour rights, health and safety, product safety and anti-corruption

03 PRODUCTS

- ✓ Moisture absorber
- ✓ Fresh-keeping product
- ✓ Oxygen absorber
- ✓ Odour remover
- ✓ Others

SUPER Absorption series

Proven to be the most effective desiccant for ocean transportation.

Trusted Performance

Proven Reliability

Protecting What Matters

SUPER Absorption

Calcium Chloride Desiccant

SUPER Absorption Series calcium chloride desiccants absorb moisture and convert it into a gel, effectively capturing and isolating the moisture away from cargo and merchandise while eliminating any possibility of leakage. These desiccants offer a proven absorption capacity of over 300% and remain active for up to 90 days.

>300%
Moisture Absorption

>90 days
Continuous moisture
absorption

-5°C ~ 90°C
Remaining highly effective across
a broad temperature range

Small Package Desiccant

Used in cartons, shoe boxes, poly bags, etc.

Size: 2g, 5g, 10g, 25g, 50g, 100g

Sticky Pack Desiccant

Used in box lids, cartons, etc. Can be stuck firmly to any dry and clean surface.

Size: 2g, 5g, 125g, 250g

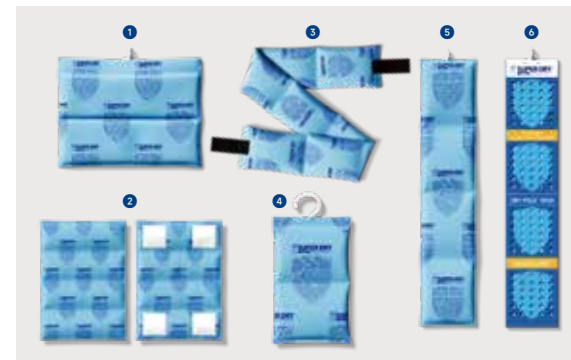

Container Desiccants

Used to absorb moisture and lower humidity inside containers to avoid condensation.

Size: 250g - 2000g

Same Protection
Gentle on Earth

Contain $>15\%$
recycled materials

GREEN Absorption Magnesium Chloride Desiccant

The magnesium chloride desiccant is the newest addition to the GREEN Absorption Series. During the moisture absorption process, water vapour is converted into a gel, effectively preventing condensation and providing reliable moisture protection for a wide range of products.

$>280\%$
Moisture Absorption

>90 days
Continuous moisture
absorption

Product Innovation

SUPER DRY offers a wide range of customisable moisture protection solutions, from standard desiccants to advanced technologies. Tailored to meet each customer's unique needs.

- ☐ Special-purpose desiccant
- ☐ Tablet desiccant
- ☐ Deodorising desiccant
- ☐ 2-way humidity controller
- ☐ Fresh-keeping product
- ☐ Others

Factory Assessment Service

SUPER DRY assists your factory in assessing moisture damage risks within the supply chain and provides a detailed improvement plan to minimise risk.

Unlock the full potential of SUPER DRY products with our expert guidance, offering the most cost-effective solutions for all your transportation and storage needs.

Container Loading Guideline

Our technical team will be on-site to guide the container inspection and train factory operators on the proper use of container desiccants. Using professional instruments, we will also test the moisture levels of the container's wooden floor. All findings will be documented in a detailed written report.

Professional Training & Workshops

SUPER DRY offers comprehensive professional training and seminars, available both online and on-site. Drawing from our extensive expertise in factory assessments, our programs equip customers with the knowledge to manage risks from both external factors and internal practices.

By participating, customers will gain valuable insights on how to effectively prevent moisture-related damage to raw materials and products.

Simulation Testing

- Intelligent Tracking & Recording System
- World-Class Laboratory

Real-time digital data logging captures temperature and relative humidity throughout ocean transportation, enabling SUPER DRY to analyse environmental conditions and identify the most effective solutions for implementation.

The SUPER DRY R&D Centre is equipped with advanced climate chambers that simulate the effects of temperature and moisture during transportation and storage. Ensuring optimal product performance under real-world conditions.

SUPER

USE AUTHENTIC SUPER DRY PRODUCT

Risks of Using Fake SUPER DRY

Fake desiccant products are often sold at cheaper prices, but they come with lower quality, putting you at a higher risk of significant problems and greater costs down the line.

Moisture damage can compromise textiles, leather, wood, paper, electronics, food, and machinery. Causing mold, corrosion, warping, and packaging to become soggy or even failure. By preventing moisture-related losses, exporters protect product integrity, reduce waste, and strengthen sustainability performance. The result is a more reliable supply chain, lower environmental impact, and goods that consistently arrive in pristine, brand-defining condition delivering its full value.

SUPER DRY Anti-counterfeit App

SUPER DRY's anti-counterfeit protection ensures you always receives our high-quality, authentic products with superior moisture capture performance.
